About the Workshop

Research always draws out certain inferences, finding and conclusions which in turn pave way for government and other entities to formulate appropriate policies. So, standing at the corridors of research in any discipline, an in-depth knowledge in statistical techniques for data analysis is indispensable.

It is in this backdrop that the current workshop has been envisaged, and it focuses on the conceptual comprehension of various statistical techniques and econometrics packages with practical sessions.

The proposed outcome of the workshop is to enrich the participants with latest developments in the field of theoretical and empirical research. The lectures are supplemented by hands-on instructions on empirical applications using relevant software like Eviews, SPSS & Mega Stat.

Scope of the Workshop

The Technique for Data Analysis in Research will help the Post Graduate students, Research Scholars and the budding faculties in gaining an in-depth theoretical and practical knowledge in data analysis.
