## THINK PAIR SHARE – 2021

To think-pair and share, this is a strategy to improve students thinking and reading ability. This makes students involvement in answering a question by thinking and sharing their thoughts and knowledge together. This improves the student's knowledge as well as their ability to solve problems.

The session was conducted by Dr. Jenson Jacob. The teacher poses a question "**How to survive pandemics?**" and the students were given time to think on their own (10 m). The teacher gives a detailed explanation, how to interchange their thinking among group. Teacher ensures the involvement of each and every student, by sharing their thoughts.

## THINK PAIR SHARE -2019

The think-pair-share strategy is a versatile and simple technique for improving students reading comprehension. It gives students time to think about an answer and activates prior knowledge. Think pair share is a collaborative learning strategy in which students work together to solve a problem or answer a question about an assigned reading.

The session was conducted by Dr. Jomet k sebastian. The teacher poses a question "Is stem cell treatment really promising?" and gives students thinking time on their own (up to 2 mints). The teacher clarifies what students need to try and explain to each other in talk partners. Each pair compares their ideas and reaches a mutually agreed response to the question. Teacher ensures that every student has the opportunity to explain their thoughts to an audience and contribute to a shared solution. Then the teacher gathers ideas across the class room about students thinking.

## THINK PAIR SHARE -2018

Think pair share is a collaborative learning strategy in which students work together to solve a problem or answer a question about an assigned reading. The think-pair-share strategy is a versatile and simple technique for improving students reading comprehension. It gives students time to think about an answer and activates prior knowledge.

The session was conducted by Dr. Geethu Daniel. The teacher poses a question “**Is Cancer a single Disease**” and gives students thinking time on their own (up to 2 mints). The teacher clarifies what students need to try and explain to each other in talk partners. Each pair compares their ideas and reaches a mutually agreed response to the question. Teacher ensures that every student has the opportunity to explain their thoughts to an audience and contribute to a shared solution. Then the teacher gathers ideas across the class room about students thinking.
