

Biofest 2020 (Genesis 2020)

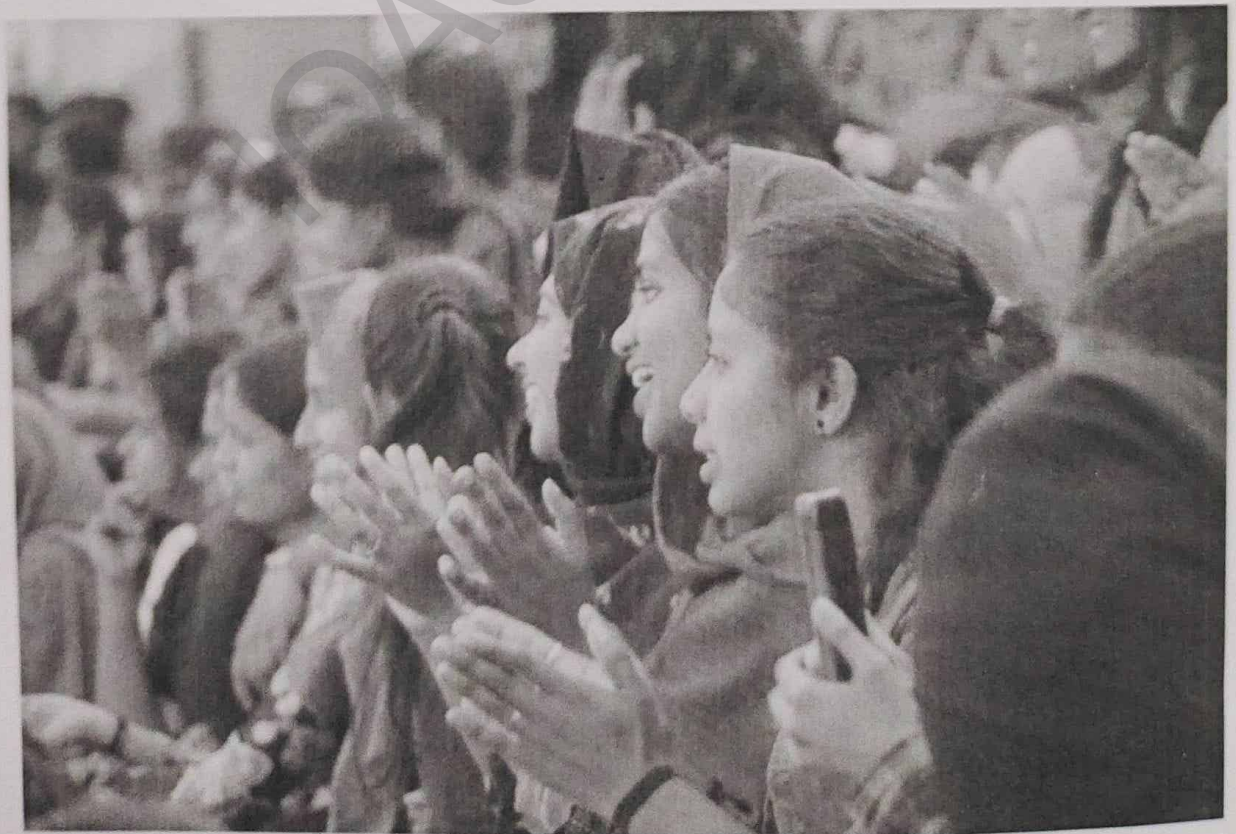

1. Inaugral section

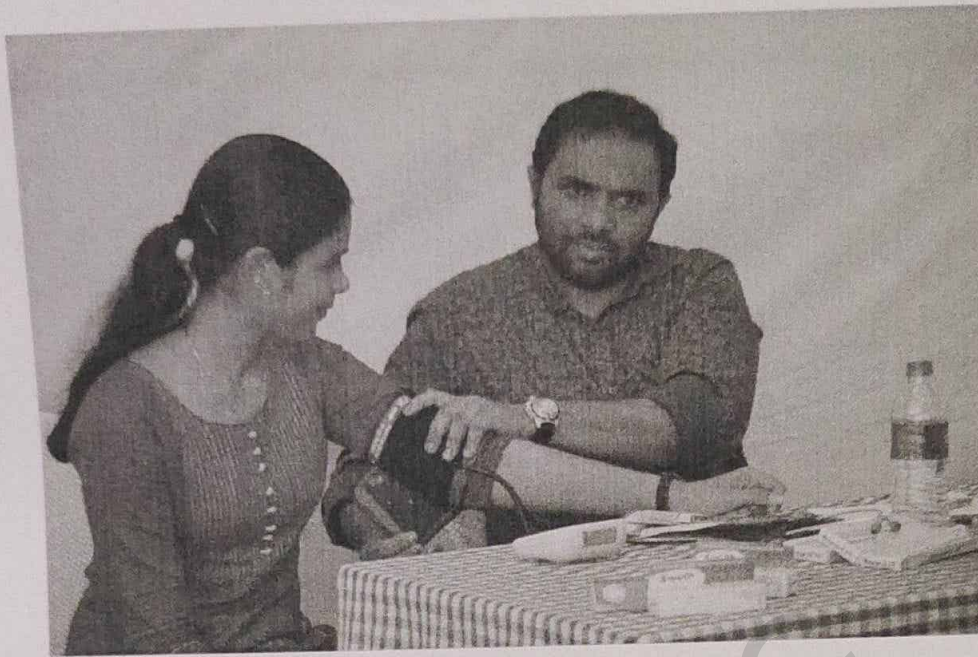

Biofest 2020 named as **Genesis 2020** was organised by department of biochemistry, pazhassiraja college, pulpally under Calicut university. The programme was inaugurated by bindu prakash, panchayath president of wayanad. The welcome speech was done by Dr. Jomet Sebastian, the head of the department of biochemistry, pazhassiraja college, pulpally. The presedential address was done by Dr. Anil kumar, principal of pazhassi raja college, Wayanad. The felicitation speeches were done by Fr.varghese kollamavudy, CEO, Fr.George alumootil, bursar, Prof.Thara Philip, Course coordinator and Ajay das, Chairman of the college. The programme committee has principal as Chairman and Prof. Thara Philip, Fr.George alumootil and Fr.varghese kollamavudy as convenors. The staff coordinator of the programme was Dr. Jomet Sebastian and student coordinator was Ashish. K.S. The cheif special guest of the genesis 2020 was Dr. Adeela Abdullah I A S, District collector of wayanad took class on the role of woman in science. The speech of the collector motivates and influence the students. The fest was scheduled with different sections and programmes.

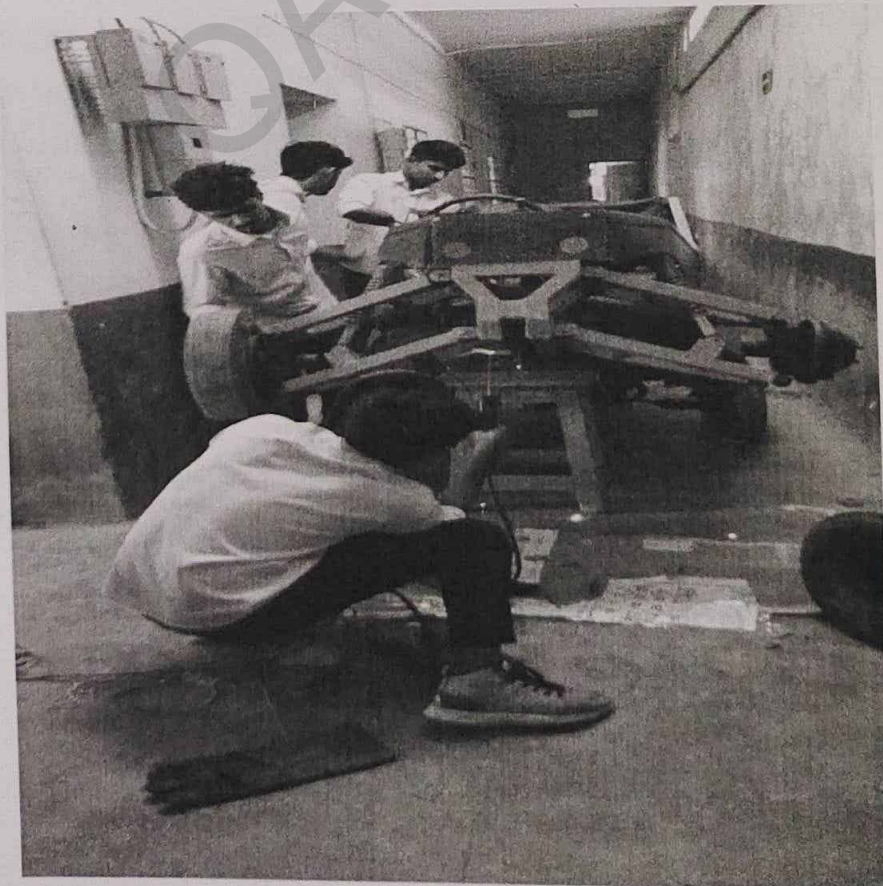

Inauguration by Bindu prakash, panchayath president of wayanad

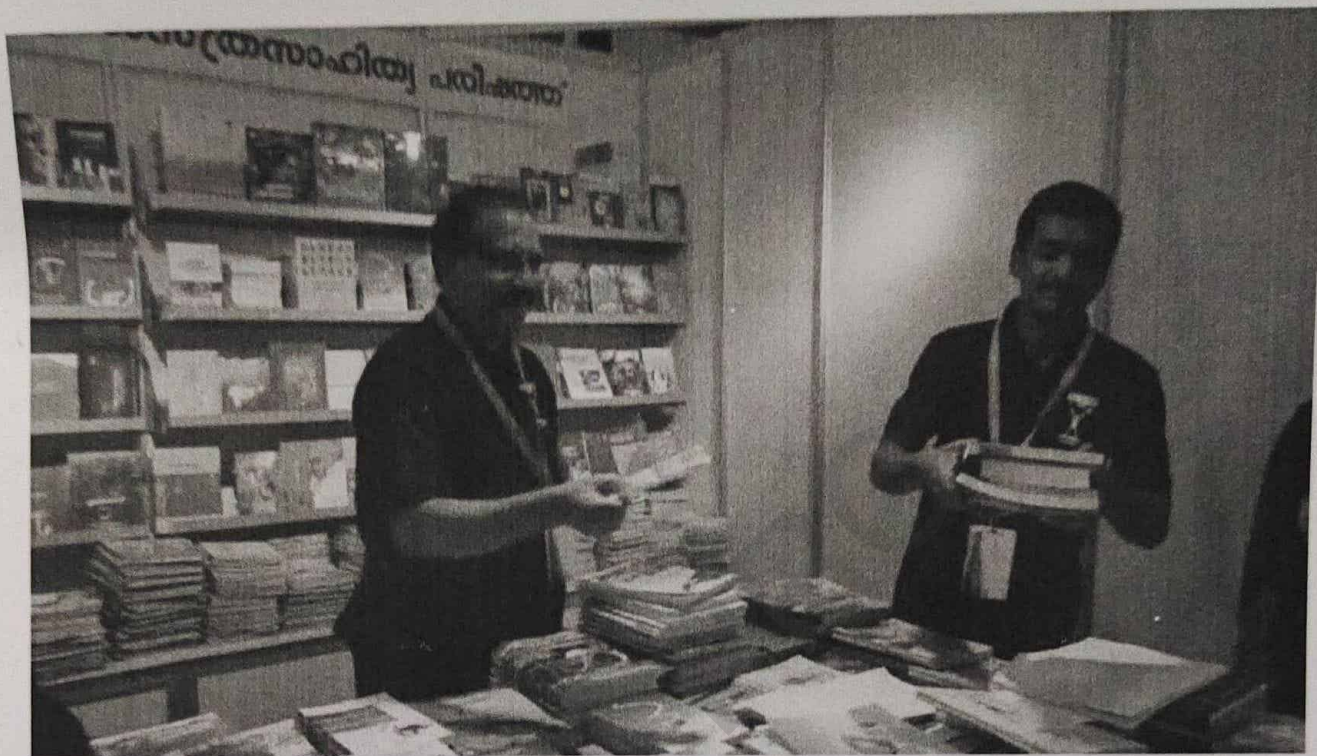

Automobile Exhibition

The automobile exhibition was shown by the students of polytechnic from wayanad. A buggy was formed from autorickshaw engine and charging of phone using candle was exhibited. It was a new experience for the students to visualise the automobile exhibition. This was a new experience of the students, those who are participated in the function.

issues. LUCA is the online science portal of KSSP. They also exhibited a box which stabilises and maintains the heat. It was a novel information for the students about the boxes.

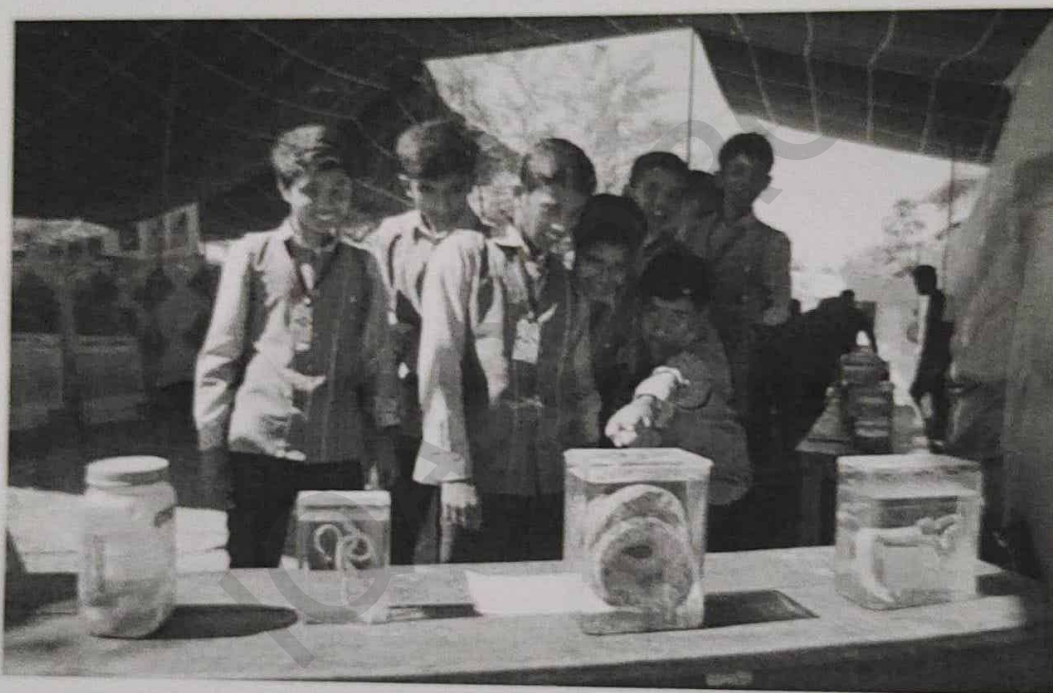

Chemical lab specimen exhibition by Pazhassiraja college Biochemistry students

The students of our department exhibited several models and experiments. The biochemistry students of our college are very much interested in presenting the models and explain the biochemical experiments. The biochemical experiments includes the qualitative analysis of carbohydrates includes monosachrides, oligosachrides and polysachrides, proteins and lipids. Students showed the models of dialysis unit and scanning techniques like MRI. They give an awareness programmes related to several viral disorders including Corona viruses. Explanation of microscopy and microbiological specimens were conducted by the students. Experiments and its evaluations provide a scientific knowledge to students, those who are participated in the programme.

Exhibition by Calicut medical college

The exhibition was done by the students of government medical college, Calicut, Kerala. They exhibited different internal organs and diseased stages of internal organs in the human body. They showed the demo of internal organs which are affected by the excess consumption of alcohol and smoking. It was an inspiration for the students, those who are participated in the biofest. The exhibition also involve the embryonic development of a zygote during fertilization or different stages of an zygote in womb. The exhibition was further proceeded by showing different snakes. This was a new information for the audience gathering in the programme. This Organ exhibition was a wonderful experience for us.

Exhibition by sashtra sahithya parishath (KSSP)

KSSP exhibited several books and magazines which are useful to the students. KSSP publishes two monthly magazines, *Sastrakeralam* (for secondary school students) and *Sastragathi*, and a biweekly, *Eureka* (for primary school students) and also a newsletter *Parishad vartha*. *Eureka* and *Sastrakeralam* are intended for children and the newsletter for members. *Sastragathi* is the organization's main magazine. Also KSSP's major contribution is in publishing science books in Malayalam with more than 700 titles already published. One of the latest books published is *Jeevarekha* by Dr.M.P.Parameswaran. In addition, KSSP has already published hundreds of small booklets, related to different

Exhibition Report
Department of History
Women in Freedom Movement

The Department of History has organised a photo exhibition on the topic Women in Freedom Movement in connection World Women's Day Celebration on March 8, 2018 at the corridor of the College adjacent to the Department of History. In this exhibition 150 photos related to various scenes of the Freedom Movement related to women have been organised.

Women Freedom Fighters in Indian History

Here are a few important female freedom fighters listed:

Rani Lakshmi Bai of Jhansi	Aruna Asaf Ali
Sarojini Naidu	Usha Mehta
Madam Bhikaji Cama	Kasturba Gandhi
Begum Hazrat Mahal	Kamala Nehru
Annie Besant	Vijaya Lakshmi Pandit

EXHIBITION REPORT
DEPARTMENT OF HISTORY
PAZHASSIRAJA COLLEGE, PULPALLY
Centenary year of Jallianwalla Bagh

12, April 2019

The Department of History has organised a photo exhibition on the eve of the 100th year of the Jallian Wallah Bagh Massacre on April 2019 at the corridor of the College adjacent to the Department of History. In this exhibition 120 photos related to various scenes of the massacre have been organised.

Brief History of the Jallian Wallah Bagh Massacre

Soon after Dyer's arrival, on the afternoon of April 13, 1919, some 10,000 or more unarmed men, women, and children gathered in Amritsar's Jallianwala Bagh (*bagh*, "garden"; but before 1919 it had become a public square), despite a ban on public assemblies. It was a Sunday, and many neighbouring village peasants had also come to Amritsar to celebrate the spring Baisakhi festival. Dyer positioned his men at the sole, narrow passageway of the Bagh, which was otherwise entirely enclosed by the backs of abutted brick buildings. Giving no word of warning, he ordered 50 soldiers to fire into the gathering, and for 10 to 15 minutes about 1,650 rounds of ammunition were unloaded into the screaming, terrified crowd, some of whom were trampled by those desperately trying to escape. According to official estimates, nearly 400 civilians were killed, and another 1,200 were left wounded with no medical attention. Dyer, who argued his action was necessary to produce a "moral and widespread effect," admitted that the firing would have continued had more ammunition been available.
