## **INTRODUCTION**

Floods are the major disaster affecting many countries in the world year after year. Flash flood was one of the most common and destructive weather related phenomena. It causes damage to lives, natural resources and environment as well as the loss of economy and health. Every year, the floods leave a trail of destruction, washing away villages, submerging paddy fields, drowning livestock, besides causing loss of human life and property in billions.

## **KERALA FLOOD**

Beginning of July 2019, severe floods affected the south Indian state of Kerala, due to unusually high rainfall during the monsoon season. It was the worst flooding in Kerala in nearly a century. Over 483 people died, 14 are missing. At least a million people were evacuated, mainly from Chengannur, Pandanad, Aranmula, Aluva, Chalakudy, Kuttanad and Pandalam. All 14 districts of the state were placed on red alert. According to the Kerala government, one-sixth of the total population of Kerala had been directly affected by the floods and related incidents. The Indian government had declared it a Level 3 Calamity, or "calamity of a severe nature". It is the worst flood in Kerala after the great flood of 99 that happened in 1924.

Thirty-five out of the fifty-four dams within the state were opened for the first time in history. All five overflow gates of the Idukki Dam were opened at the same time, for the first time in 26 years.<sup>[17]</sup> Heavy rains in Wayanad and Idukki

have caused severe landslides and have left the hilly districts isolated. The situation was regularly monitored by the Prime Minister, and the National Crisis Management Committee coordinated the rescue and relief operations.

## **WAYANAD FLOOD**

Widespread damage to properties and crops has been reported in the heavy rain that lashed many parts of the Wayanad district for the past several days.

Normal life in many parts of the district was hit on Tuesday after low-lying areas were inundated in the torrential rain. “The district administration is adopting steps to open relief camps in Kottathara, Panamaram, Sulthan Bathery and Mananthavady to shift families living in low-lying areas,

Pazhassiraja College Pulpally located at remote area of Wayanad.

Students of Pazhassiraja college undertake various flood relief activities under the guidance of Dr K Anilkumar, Principal, Pazhassiraja College Pulpally, Wayanad, All faculties of our college coordinate this activity. NCC cadets and NSS volunteers take higher initiatives for coordinating these activities.

List out the activities conducted by various Departments of our college.

STUDENTS OF PAZHASSIRAJA COLLEGE PULPALLY UNDER  
VARIOUS DEPARTMENTS UNDERTAKE THE FOLLOWING  
ACTIVITIES

No	Activity	Item & Quantity	No of Volunteers involved	No of days of activity	Monitory Value(Ap prox.)

## CONCLUSION

Over the past few years, many case of flash flooding have taken place in many areas. Flash floods are caused by high amount of rain over a short period of

time. A flash flood is when it comes out of nowhere. A good example for a flash flood would be a Tsunami, if coordinated properly and implemented effectively, will mitigate the chronic flood problem of the state to a certain tolerable level.
