

PAZHASSIRAJA COLLEGE
SANITIZER PREPARATION AND DISTRIBUTION PROGRAMME

Biochemistry Department of Pazhassiraja College organized a sanitizer production and distribution programme in collaboration with PulpallyPanchayath, which was relevant during this pandemic situation. The programme was inaugurated by Dr.Jomet K Sebastian (Head of the department) on March 23rd 2020, in the presence of Panchayath authorities; they made a social involvement during the occasion. Production was led by the students of Biochemistry.

The components that were used for the preparation of sanitizers are given below;

COMPOSITION:

- Isopropyl alcohol, also called rubbing alcohol (99%)
- Hydrogen peroxide (3%)
- Glycerin, sometimes called glycerol
- Distilled water (or water that has been boiled and cooled)
- Vitamin E
- Alovera Gel

For the distribution of sanitizers more than 100 bottles were prepared. Each bottle contains 100ml sanitizer. The preparation and distribution was repeated for duration of 2 months.
